Philips-AurAir Combination Installation Guide

Step 1: Connect the Philips Air Purifier to Wi-Fi

1. Download and install the Philips "Clean Home+"app
   from the App Store or Google Play

2. Put the plug of the air purifier in the power socket and touch ⏻ to turn on the air purifier

-> the Wi-Fi indicator blinks orange (ready to connect) when you install for the first time

-> if it does not blink orange press the two most left icons simultaneously for a few seconds

3. Make sure your smartphone is connected to the Wi-Fi network you want the purifier to connect to

4. Launch the "Clean Home+"app" and click "Connect a New Device" or press the "+"button on the top of the screen. Follow the on-screen instructions to connect the air purifier to your Wi-Fi. Tip1: when asked to create an account, you can choose the word 'later'on top, to skip this for now. Tip2: Give your purifier a logical name, for example the name of the room where it is installed.

5. When the Wi-Fi icon on your purifier is white and not blinking, your connection is successful!

Step 2: Connect the AurAir air quality meter to Wi-Fi

For Android Phones

1. Download and install the "AurAir Wifi" app from the Google Play store

2. Start the app, when asked for location, say yes

3. Make sure your smartphone is connected to the Wi-Fi network you want the meter to connect to

4. Check the Wifi name, enter the password, device count 1 of higher when installing more meters, tag broadcast, press CONFIRM

5. Wait a minute, the red cross on the meter should be gone now. If the app gives an ip-address the connection is made. You may also get the message connection failed. This step needs a reboot step which could fail in some unexpected environments. It still may have worked. Check if the meter got an IP address by pressing the settings button (the wheel) on the meter once. Reboot by putting the meter out and in the power socket. Try again. If sometimes needs one or two tries to get it right.

For Apple Phones

1. Download and install the "Espressif Esptouch" app from the Apple Store

2. Start the app, when asked for location, say yes. Next step, select EspTouch.

Steps 3. to 5. Same as above

Step 3: Connect the AurAir and Philips to each other

1. On the AurAir meter, press the settings button (the small wheel) twice to see the QR code for the AurAir web dashboard. Scan the QR code with your phone and click the link to see the dashboard.

2. On the AurAir dashboard you see the meter data and you change your meters settings. To connect the AurAir and the Philips:

3. Choose the settings icon (the small white wheel) to get to the next screen

4. Choose the network icon to get to the AurAir-Philips connection screen

5. The first two sliders should be set on green, and press 'send' (= 'verzenden'). The bottom slider will say "searching", and after a minute display the name of the purifier you want to connect to this AurAir meter. Put that slider on green and press send. If you see more purifiers (if you are installing multiple machine in a building) keep the other purifiers you see on red.

6. Test the connection by breathing on the meter until it turns yellow or red, the Philips cleaner must now start automatically working in a higher mode.

Step 4: Troubleshooting the connection

1. Check if both products are still connected to your Wi-Fi (both should display the Wi-Fi icon in white). When needed do a hard reset on each products by disconnecting it from the power source for 30 seconds. Both products are designed to recover their connection to Wi-Fi and to each other.

2. Check, using the QR code, if the AurAir still sees the Philips. (The QR code appears after pressing the settings button twice). On the portal 1st screen click the wheel on the left, 2nd screen click the men bottom-left, 3rd screen has 3 sliders, make them all green, press send.

3. In case the connection cannot be established you can use the Philips in Automatic mode. The Philips will still work. You can also operate the air purifier using the app on your phone.

Philips-AurAir Combination User Guide

Part 1: Operating the AurAir air quality meter

Screen button
Press 1 time: Screen on black
Press 2 times: Scherm dimmed
Hold: Update firmware

Display button
Press 1 time: Show graph
